GEO JOBS

Mikala Jaramillo, Faiza Rahman, Cole Amlong, Sarthak Sirotiya, Thomas Langford

Introductions

DEMO

https://www.geojobs.me/

Self-Critique

- **What did we do well?**
    - We were very good at communication
    - Everyone was eager to help if someone was stuck
- **What did we learn?**
    - The full-stack development toolset
    - Manage our time more effectively
- **What did we teach each other?**
    - How to work better as a team

Self-Critique

- **What can we do better?**
  - Prioritize customer feedback/requests
  - Communicate how we implemented various aspects of the website
    - Bus factor
  - Create a thorough vision of how to implement something before starting
  - Use development versions for each aspect of the website (in case someone were to hypothetically take down production on accident)
- **What effect did the peer reviews have?**
  - Constructive criticism
  - Helped us figure out what we were doing well and what we could improve on
  - Kept us accountable for our responsibilities
- **What puzzles us?**
  - AWS Free Tier??
  - How to make website more responsive?

FindMyMarket Critique

- **What did they do well?**
  - Displayed important nutritional information in digestible format
  - Good idea to get people involved in their local communities
- **How effective was their RESTful API?**
  - Effective because all information can be quickly reached through some model page
    - Many options for filtering and searching
    - However, filtering is only one attribute at a time
- **How well did they implement our user stories?**
  - Waited on implementing user stories, but eventually got a lot done
    - Responded to each one with whether they could complete it or not

FindMyMarket Critique

- **What did we learn from their website?**
  - There's a lot of farmers markets to explore
  - More than fruits and vegetables at farmers' markets
- **What can they do better?**
  - Better use of graphics
    - Lacks any on their markets, states, and produce pages
  - Highlighting
- **What puzzles us about their website?**
  - Model pages – tricky to interpret
  - Filtering - difficult to use

Thank You!
